SEE WHAT THE EMT-7R CAN DO FOR YOU!

INCREASE PRODUCTION, QUALITY & YOUR PROFITS!

CHECK THESE OPTIONS!

3 Top Shaft Control Options:

1. Air Cylinder - Economical top shaft control with adjustable depth stop.

(Cannot be used with flange or spin in collar rolls)

2. Air Over Oil Hydraulic Cylinder - Incremental control with two position foot switch.

(Suitable for all roll sets)

3. Digital Programmable Top Shaft Control - For production shops, program top shaft position. Great for accurate repeatability.

(Suitable for all roll sets)

• Large Front Face Plate (20"x20") - Form large diameters easily with bearing supports for added stability.

• Pipe Support Stand Spring loaded to apply constant pressure for quick loading and removal of pipe. Support long lengths of pipe easily.

• 14GA-30GA Capacity

• 11" Throat Depth

• Sensorless Vector Variable Speed Control - High torque at low speed!

• Safety Covered Foot Switch

• High Efficiency Motor

• Optional Base (Raises the standard working height from 33" to 38")

PROVEN RELIABILITY ASK OUR CUSTOMERS!

"Our 7R Power Rotary Machine with the new digital control is fantastic! It is quick and easy to program. I wish I had a second machine! The spin in collar rolls produce an excellent quality fitting. In the first four months that we owned the machine we produced a couple thousand spin in collars - works great! We are very happy with it."
M. Tarantelli, President
Sterling Sheet Metal Mfg. Inc.

"We had one project that required 28,000lbs of 18GA stainless steel duct. The 7R was our KEY MACHINE. We moved it to the job site offsetting lap joints. It was fast and dependable an excellent production machine. The 7R was a LIFE SAVER!"
B. Kelly, Project Supervisor
Kelly Brothers Sheet Metal Inc.

"We purchased ten (10) 7R Rotary Machines for our production plant. For the most part we are working with stainless steel and galvalume, and these
