MetosaCNC A Low Cost, Versatile CNC Lathe

Clausing/Metosa CNC Lathes - the most versatile low-cost CNC lathe solution available. Designed and built with the features and power to handle your toughest jobs.

Clausing MetosaCNC Lathe Features

- Fagor 8055i TC Control Package offers great value and reliability with many standard features to simplify
 operation and increase productivity
- USB Drive Port for fast and reliable program uploads and downloads
- Ethernet Communication Port allows easy networking and part program transfers
- Hardened and Ground (43-47 Rockwell C) slides and guide ways for carriage and bed assures long life and allows high speed axis positioning
- Rigid Main Spindle with high precision angular contact bearings, pre-loaded and greased for life, guarantees
 extremely accurate machining
- Center Driven Spindle drive belt runs between front and rear spindle bearings reducing spindle vibration and evenly spreads motor torque over the spindle bearings
- Variable Speed AC Spindle Drive Motor offers exceptional machining power
- Rail Mounted Console enables the control to be positioned for maximum operator convenience
- Two MPG Handwheels for easy manual operation
- Auto Lubrication maintains proper lubrication to all critical machine components
- Built in Coolant System with manual and programmable on-off
- Precision Hardened and Ground Ballscrews for smooth performance and accuracy
- Interlocking Guards for safety and a clean work environment
- 4-way Electric Auto Toolpost for quick setups and automatic tool changes on 14" and 17" models
- 8 Station Disc Power Turret for more tool flexibility and automatic tool changes on 20" models, (optional 14" & 17" models)
- Constant Surface Speed for increased tool performance and improved surface finishes

Fagor 8055i TC CNC Control

Features conversational programming with graphics, Rigid Tapping, Ethernet communication port, 4Mb memory and much more.

Fagor's user-friendly conversational CNC controls offer many powerful and versatile programming features. The extensive use of graphics makes programming and operation easy. Set-up time is minimized for both experienced and beginning operators. Both conversational and G-code commands can be mixed in a single part program.

The Fagor 8055i TC control allows editing one program while executing another. An on-board profile editor with graphic support allows complex contours to be generated with a minimal amount of information taken straight from the blue print – no need to trig or calculate data.

The tool inspection features allows the operator to interrupt the machining cycle to check tool condition, replace if necessary, reposition the axes and resume execution of the program at the point of interruption.

Control Features

- "Conversational" Programming
- On Board Profile Editor
- Multi Repetitive Cycles for automatic finishing, roughing, drilling, threading and grooving cycles
- 10.4" Color LCD display Toolpath or solid graphics
- Programmable increments: 0.0001" min., 999.9999" max.
- Thread cutting leads: 0.00001" min., 4.0" max.
- Multiple part program storage
 4mb Memory
- Constant Surface Speed/Direct rpm programming
- Menu programming format with operator prompts
- Two axes linear and circular interpolation
- Tool inspection Inch/metric data input
- Rigid Tapping
 Text Search
- Full Alpha/Numeric Keyboard
- Background Editing Thread repair cycle
- Decimal Point Programming
- Optional Stop and Block Skip
- Full ISO G-code programming
- Conversational cycles can mix with G-code

Clausing MetosaCNC Lathe and SmartLathe Standard Equipment

- Transformer for customers stated voltage
- Horizontal 4-position electric turret (non bi-directional) on 14" & 17" swing models
- 8 Station Power Turret on 20" swing models
- Complete enclosure and chip tray
- Constant Surface Speed

- Electronic handwheels
- Low Voltage worklight
- CE compliant Fixed Centers
- Main Spindle reducing bushing
- Operating Manual
- Manual tailstock

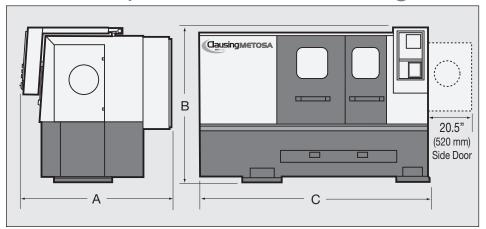

8 Station Power Turret, optional on 14" & 17" swing models, standard on 20" swing models
