Precision M

Manufactured to exact tolerance:

Parallelism:

**X - axis
.0008"/20"**

**Y - axis
.0008"/20"**

**Knee
.0008"/12"**

**Quill travel:
.0005"/5"**

**Ram:
.002"/7"**

**Spindle bore runout:
.00015"**

"State of the art technology. It's the machine everyone in the shop wants to use first."

"I love the precision and accuracy. A great all-around performer."

"I like the attention to details - this machine has the right feel and touch."

"Smooth and quiet. The quietest mill I have ever ran."

5VKF

Milling Machine

AC FREQUENCY DRIVE BENEFITS

Latest generation of "Flux-Vector" AC-Frequency inverter drive delivers full range of spindle speeds without conventional vari-speed pulley. Less moving parts mean greater reliability and productivity.

Runs on 3-phase or 1-phase power without modification. Use it in the shop or at home. No phase converter required for single phase power.

Extra large digital rpm display makes for easy and accurate spindle speed readings.

Load meter provides real-time monitoring and feedback of machining performance to maximize productivity.

Higher spindle speeds, 60-550-4500 rpm with optional 6000 rpm spindle available for high speed machining or engraving applications.

Special inverter-duty high efficiency spindle motor with independent auxiliary fan provides reliable and efficient cooling airflow thru entire milling head assembly.

Industry leading performance with fastest 0-4500 rpm spindle, clocked at under 3 seconds. Near instantaneous spindle reversals at normal spindle speeds allow for dependable tapping without additional attachments.

OUTSTANDING FEATURES INCLUDE:

- Precision class-7 spindle bearings.
- Quick-set quill stop speeds set up times.
- Precision ground leadscrews with backlash compensating double-nut design for superior accuracy.
- Table surface and all slideways Hardened and Ground, a feature pioneered and proven by Kent mills, now widely imitated by our competitors.
- Meehanite® casting with internal rib-matrix for extra rigidity and long lasting durability.
- Metered check valves insure proper distribution to all lubrication points.
- Internal coolant reservoir with dish-in base.
