

NEW - MODEL JL24-LCB POWER CHEEK BENDER by J&L Machinery

The ONLY Power Cheek Bender on the market that allows you to turn both 90 degree bends on the inside throat of your elbows at the same time!

Single legs are no problem either!

The unique L-Shaped design, and quick cycle time makes short work of these bends without having to transfer the fitting from one side of the machine to the other.

The comfortable working height, and the fact that the material stays flat on the table throughout the bend cycle, makes the JL24-LCB a safer, more user-friendly alternative.

All J&L Machines are
Proudly Made in the U.S.A.!
